they/them

Cheat sheet:

- go mod init [name]

- go list -m [-u] all

- go list -m -versions my/go/module

- go mod edit -replace 'my/go/module=../myfork'

- go mod tidy

- go mod why

garden

We learned to:

- Initialize a module

- List and change requirements

- Fork & change code locally

- Mix multiple major versions

- go get & dep deficiencies

garden
